

Enhanced Personal Protective Equipment (PPE) for First Aiders on Site

Enhanced Equipment Pack for First Aid

Where social distancing cannot be maintained, in order to treat an injured/ill person in a life threatening situation First Aiders are advised to wear the appropriate PPE/RPE.

PPE is used for 2 reasons:

- To protect staff from contamination
- To reduce the risk of cross infection through the reduction in contamination and transference.

AUTHORISED FIRST AIDER USE ONLY

1 Box Disposable Surgical Gloves

Disposable Gloves must be worn, they can reduce the risk of acquiring infection through direct skin contact between IP and first Aider. Gloves are for single use only.

2 No. Disposable FP Coveralls

Disposable fluid-repellent coveralls/gown must be worn; coveralls/gown are for single use only.

2 No. Disposable Face Visors

Eye/Face protection must be worn when there is a risk of blood, body fluids, secretions and excretions splashing into the face and eyes, Eye/Face protection are one use only.

2 No. FFP3 Disposable Face Mask

Disposal Surgical mask or Disposal Filtering face piece respirator will protect the wearer from potentially infectious substances; when worn correctly they seal firmly to the face. Mask are one use only.

5 No. Clinical Waste Sacks

All waste must be treated as clinical waste as disposed as so.

The equipment contained here-in is solely for enhancing on-site authorised First Aid Kits for the safety and protection of First Aiders when dealing with on-site incidents. Items are not to be removed except for dealing with First Aid incidents requiring their use.

Equipment images are for illustration purposes only - the kit provided to you might appear different.

On site negligence and misuse may incur disciplinary action against those found to be misusing this critical safety equipment. Replacement items can be ordered from J Coffey Plant.
