

J COFFEY MAIN CONTRACTS

Windsor Leisure Centre for The Royal Borough of Windsor & Maidenhead

Design and Build extension to an existing Leisure Centre close to the Olympic rowing centre at Eton Dorney.

This steel framed extension was constructed on top of the existing building to house additional weights, spinning and general exercise areas. The project was successfully completed on time without disruption to the daily operation of this extremely busy sports and leisure facility.

The building was largely clad in composite cladding with a fully glazed curtain walling system overlooking the river elevation. Services changeovers were undertaken without disruption to existing supplies. The whole building was finished to a high standard.

Value: £450,000

Contract: JCT Design
& Build 2011

Duration: 20 weeks

Completed: December 2012

Architect: David Howarth Architects

Structural Engineer: F J Samuely &
Partners

"... a very good result all round. (J Coffey) was very efficient and worked really well with the site staff and customers. I would highly recommend them to any other departments. The gym users are very impressed with the new facility and hopefully we will sell the required amount of memberships to meet our budget targets."

Kevin Mist (Head of Leisure Services), Royal Borough of Windsor & Maidenhead
